How Bold Is Your Gold?

June 27th, 2017 | Stephanie Dore

Yellow gold is once again having a major moment—just in time for the summer sun to set it off right.

This is an extraordinary metal with a unique heritage. Found naturally in its distinct yellow hue, it is tinted white and rose with the addition of other minerals. Gold is strong and malleable, which has made it ideal for centuries of high craftsmanship, from ancient coinage to modern engagement rings.

Yellow gold doesn't just hint at luxury—it shouts it from the rooftops and adds instant sophistication to any outfit, whether you riff on 80s glam or 90s minimalism. The sunny hue complements every skin tone, and there are no rules to how you rock it. Here are some of our favorite ways to show off this gilded glory.

### **History Class**

Jewelry takes the best from historical patterns, textures, and architecture and makes it shine. Some of our favorites are substantial Byzantine chains, delicate filigree earrings, and floral-inspired engraved locket.

### **Ship Shape**

Nothing says summer quite like a nautical nod. Our fave is a classic rope link because it makes us feel oh-so-Jackie O. This season we're featuring oversized statement earrings, a dainty pendant that goes all out on the anchor theme, and a chunky bracelet that we'll likely rock all year round.

### **Inner Artist**

Show off your stylish side with pieces that recall modern art with sweeping lines and a clean aesthetic. We love a dramatic drop earring or a bold cuff bracelet. Make it a bold piece that stands out on its own or dial up the drama and wear them all at once!

### **Day-to-Day**

From boardrooms to brunch, your everyday jewelry essentials should shine bright. Try on-trend bar stud earrings, a band that glitters with a streak of diamonds, or a slender bracelet that goes with everything.

### **Shake Things Up**

Pair yellow gold with its sister shades in pieces that feature white, yellow, and rose together. Tri-color styles take advantage of this contemporary look and mixing metals instantly makes your entire jewelry wardrobe more versatile.

### **Relive Your Glory Days**

Take it old school with references to over-the-top 80s glamour, hippie-chic 70s fringe, or mid-century modern all updated with a contemporary twist.
